This is a beautiful game. Simple but engaging--I'd even say elegant. Just finished Act One, and I can't wait to see what's to come.. would recommend if you like some anime tiddies. I enjoyed the game. I'm not extremely good at solving puzzles so I appreciated the fact that I was able to solve most of the puzzles in this game without using the "cheat" button. And when I did get stuck there was a way out. The graphics were well done. The hidden objects were well hidden in most cases but not too difficult to find with some effort. I liked the game's theme based on voodoo. Music supported this atmosphere. I liked the plot so it was very disappointing when the game ended with a "To be continued". I've attempted to find the sequel but there doesn't appear to be one. I'm going to give the game a positive review because I did enjoy it over all but I have to say the fact that it doesn't have an definite follow-up was very disappointing.. Good product with a very active developer. Look forward to watching this product evolve :-). A must have for anybody who likes the main game.

What a delightful little game.

Simple idea with simple graphics but a wonderful heart.

Go out explore a small but growing universe, find friends, make enemies, gather resources and solve puzzles.

Don't get this expecting the dev to lead you by the nose to the solutions, this is an old school RPG you are expected to figure it out yourself

Invest in a pad and a writing implement of your choice, you will be working things out and taking notes.

Definitely worth the price even at this early EA stage.. the game looks good and was very fun for me ..... untill the spider faces showed up im glad i use the safty straps. For a mobile game on PC, it's not bad.. **IT DOES NOT WORK!!!!!!!!!!!!!!**. Nice game and its still in alfa. Big Empty is one of those STP songs that made me actually start listening to a bunch more of there stuff. It's a freaking amazing song and uses some really interesting chord progressions. I'd also recommend playing the bass part as well because the bass part is really fun to play. Would recommend.. If you like RISK, you'll like this game. The menus are easy to navigate and there is a very easy learning curve, so it's a breeze to get started and begin dominating the planet.
