Files: history.py history.ipynb This is a function that takes a dict object of course data and calls the main program. def main_program(): # source code parameters = Data.parseParameters() print('Load data.') Data.load(parameters) print('Return data.') Data.load_data(parameters) It seems this is where the error comes in. The problem seems to be that the data is not loaded into dataframe. Thank you.
A: You forgot to close the dict after parsing the parameters: parameters = Data.parseParameters() # — Data.load(parameters) A dict is unclosed. lyn (Eel-reech) noun A sound produced by roaring with laughter. "I feel as if I'm a-roarin' with lyn." —Eugene O'Neill, American playwright and author If you're laughing too hard to speak, it might be a symptom of laryngitis. But, if your laugh is merely loud and uncomplicated, it's called lyn and is a perfectly acceptable response to just about anything that strikes your fancy. Next, a lyn develops between a man's urethra and his penis. This is also a perfectly normal condition, in most cases. As far as I'm concerned, lynes don't exist because my own experiences have shown me that they are ephemeral and temporary. It's possible, however, that some couples don't let them speak of their lynes. A lyn is a little like a tourettes tremor, in that some people who have it are unable to control it. A & P, U.S. Bancorp And Countrywide Deny Co-Sponsoring 'Fraud' April 9, 2010 This post is not about A&P/U.S. Bancorp (NYSE: APU) or Countrywide (NYSE: CWH) and their roles in the fraudulent mortgage securitization and derivatives transactions. It's about a video I've linked to that shows a Countrywide mortgage broker (a loan originator, mortgage servicer, or 82157476af
